

COVER LETTER (see **bottom**)

FOLLOW-up state health dept | https://www.linkedin.com/posts/mandi-pratt-chapman-ba92976_patientnavigation-healthequity-cancercontrol-activity-7151003727028486144-ZQ6R?utm_source=share&utm_medium=member_desktop

2024-12-12 - zero in: ADaM, cdisc, SDTM, TEAL?, - find better search: Indeed, Zip, etc ... DDg, google maybe better than website's search;

Too many SAS; too much digging; can not single out "R" - Navits Partners - MANY posts on Indeed/zip (mostly Indian; probably job shop) - LinkedIn - note to "Ben Jones", recruiter ... Can I start chats with a few recruiters?? - **TALK TO PEOPLE; click, click, click is time sink**

- Indeed (https://www.indeed.com/advanced_search?q=R%20regression&l=) too many SAS,
- Zip

2024-09-12 - 2 resumes, SEE ~/code/docs/jobs - 2 directories, one for ; one *clinical trials* - use quarto for actual resumes (why? I am in R world; Rstudio is very good Quarto)

2024-03-11 - Washington DC (changed my LI address - fool recruiters- experiment)

2024-01-16 - LI - finally something worked; posit's federal salesperson gave me some ideas, including openscapes 2024-01-14 - r-blogger: <https://www.r-bloggers.com/2022/03/which-data-science-skills-are-important-50000-increase-in-salary-in-6-months/> - LinkedIn ... excellent ideas in youtube videos 000_job - resume - study examples (see linked in **learning by practice statistcis** ??

2024-01-11

- Work for IT staffing company on government project??
- GSA 986 repos, 9 R repos! (Is this right way to search??)

2024-01-09 - Ore job fare, 1 recruiter VERY good - job description ambiguous? ask the **recruiter** - Oregon: use "Behavior Based Questions", STAR, Video Interview(<https://www.oregon.gov/jobs/Pages/Video-interviewing-applicants.aspx>) - Oregon: STAR, interview Q: <https://www.oregon.gov/jobs/Pages/support.aspx>

2024-01-08 - resume & cover ltr, much better(no, not perfect) - locating R jobs, do I qualify?? - filling out job apps - NOT way to go - Ask recruiters? How do I be more attractive? 2024-01-02 - Oregon, wrote directly to 'recruiter' asking how to zero in on R needs? - Minnesota DHS is R shop (just hired someone) - Do this by state ??
- Upwork, refuses to accept resume/linked ... unable to proceed.

2024-01-01

DEAD

- code.gov, once hot seems gone.
 - fecgov , same ... but now ??
-
-

Time to find job and zero in.

2023-08-26

Life/Job Notes, 2023-08-26

1. Costs: Monday will go to Patrick Olson to see about **repair costs** and **junk it** costs. When I called about oil changes, he said he had 3 week backlog and so entirely possible he's won't even look at car for a few days.
2. Costs: I have plenty of insurance, but usually with **large deductibles** and **NO collision**. Expect liability for **red truck** to add to cost.
3. Reason for *no collision*: if repair cost is more than say \$1000 it makes little sense to fix car (original cost was \$3500). I didn't think *parking* would be large *collision* damage. (*collision* sounds like, well, a collision).
4. Sleeping in office last few weeks (heat) but not a wise or extended strategy.
5. **Electric Vehicles** absolutely need to do research. My monthly driving, 100-200 miles, means that OLDER, electric vehicles, with range less than 100 miles per charge could be ideal for. I suspect most buyers, for new or used, want much higher miles per charge. Need to see if prices reflect this.

<https://www.recurrentauto.com/research>

Not going to buy this one, but example of \$6000+ used EV (car + needed repairs); 50K miles

<https://www.autotrader.com/marketplace/buy/nissan/leaf/2012/JN1AZ0CP3CT017447?listingId=689873778>

4. On **bright side**, this time for first time in **many years** began actively looking for work (resumes, *contacting* people). Though I have plenty of minuses, the area of software I know has fairly high demand. (Not as high as kidneys or kidney doctors, but still ample). There is work for a regular company (on-side) and then there is **project work**; which is often remote via internet or on-site. Eugene is not ideal place, though I remain very comfortable here. Important: must stay with this and NOT be distracted by *cars*.

Cover letter (Dec 2024) I am an R developer with a Pharmaverse project, working on various issues, documentation, coding related to ADaM, Admiral, CDISC standards. The work is entirely in R and R packages, plus github tools, to insure adherence to tidyverse style, 97% + testing coverage and the like. Some TEAL (shiny) and related R experience roughly upto metaprogramming.
